

For All PABX & Key Telephone Systems

FJTtel Call Billing System is our in house developed software tailored for Malaysia market. With our experience for more than 15 years in the PABX and Key Telephone industry incorporated with our knowledge on Malaysia telcos (telecom companies) and ASPs (Alternative Service Provider) call rates offered. We had successfully designed and developed **FJTtel** Call Billing System that equipped with all commonly ask features by Malaysian users. **FJTtel** is the best choice for Malaysian users.

FJTtel Install Disk

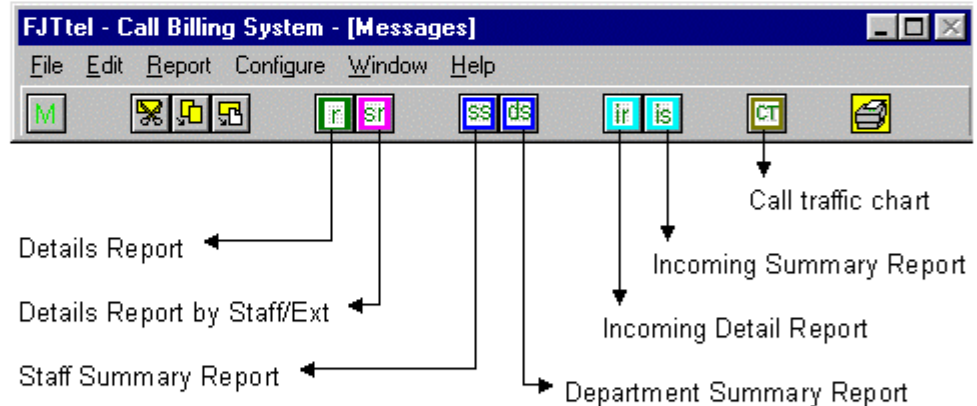

USB Software Dongle

FJTtel is designed with easy installation and maintenance. Installation can be carried out easily within few minutes. That is the reason why **FJTtel** choose USB Software Dongle as its software license key.

In the event if you need to reinstall **FJTtel** on another PC, USB Software Dongle can be transferred to the new PC and all data from your existing PC can be copied to your new PC.

FJTtel Call Billing System Tool Bar

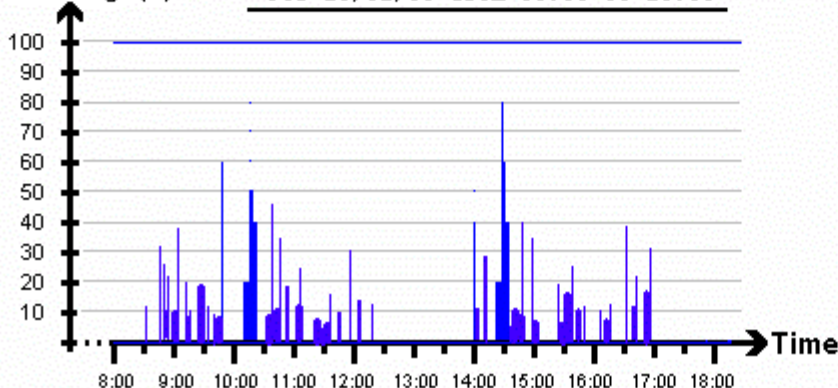

FJTtel equipped with comprehensive reports that commonly ask by customers.

Trunk Occupied Percentage (%)

Bar Chart For Call Traffic Measurement

For 23/02/06 from 08:00 to 18:00

Call traffic measurement indicates utilisation of trunks at each minute. User can refer to this chart to plan for his trunk lines expansion requirement.
